

# Pro-Treat

## Condensate Pan Treatment

**PROTREAT**

Pro-Treat™ cleans sludge, slime and other accumulations that plug condensate pan drains and eliminates the odors caused by these accumulations. It is safe when properly used, completely soluble in water and will not form any deposit on surfaces. Pro-Treat™ is for industrial use only. Place the Pro-Treat™ tablet in the condensate pan and condensed moisture will slowly dissolve the tablet, thinly coating the pan surface to give prolonged cleaning action on sludge, slime, etc.

- **Three month treatment**
- **Controls odors, overflows, water damage**
- **Keeps condensate and drip pans clean**
- **Approved for computer room use**

**INSTRUCTIONS:**

It is recommended that one or two tablets be placed in the pan each month (at least each time the A/C filter is changed). The tablet should be positioned so that condensing moisture will drip on the tablet. For large pans, tablets should be placed at both ends to assure the whole pan will stay sludge and slime free. It is simple to place one or two tablets in each pan every month or two and eliminate all the extra maintenance problems caused by plugged drain pan lines. Initial Cleaning: Use at least (2) tablets per (3) tons of cooling capacity.

**CAUTION:** Contains Alkyl Dimethyl Benzyl Ammonium Chlorides (26.5%) and other active ingredients. Avoid contact with skin, eyes or mucous membranes. Protect eyes and other portions of body when using. In case of eye contact, flush thoroughly with water for 15 minutes, then get prompt medical attention. For skin, wash thoroughly with water. If irritation persists, get medical attention.

Material Safety Data Sheet available for professional user on request.
