

# Smell-Buster

## Odour Elimination tablets

### SMELL-BUSTER

**Liquid version available**

Smell-Buster is a unique odour elimination product that doesn't just "mask" or "cover up" bad smells but actually breaks down and removes bad smells from the air. It is a very effective odour elimination product for Air Conditioning systems both large and small. It is non-toxic and approved for use in commercial and residential air systems. G2G-Smell-Buster liquid version is also available for complete odour control.

- **Removes bad odours**
- **Easy to use**
- **Highly effective**
- **Non-toxic, non-staining**
- **Liquid version available (G2G-Smell-Buster)**

**INSTRUCTIONS:** Select the appropriate sized Smell-Buster tablet for the size of the equipment being treated and remove the packaging. Place Smell-Buster in any convenient place within the air conditioning unit BUT NOT in the drain itself as the product needs to be kept dry. If possible insert in the air flow and some suggested places would be in between the evaporator and filter, or on top of, or at the side of the evaporator coil. In the case of ducted systems the tablet or tray can be just placed in the duct within the air flow. The slow release action of the Smell-Buster product will give on-going smell control with the unit running or not. Replace the tablet as during the air conditioners next service or before if the bad smell returns.

**CAUTION:** Store in a cool, dry place. Keep out of the reach of children. Avoid contact with skin and eyes.

Material Safety Data Sheet available for professional user on request.

3 sizes available:-  
 SMELL-BUSTER = 2 x 60 gram tablets  
 SMELL-BUSTER-SMALL = 10 x 12 gram tablets  
 SMELL-BUSTER-8 = 1 x 225 gram tub
